-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 16 March 2010.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 24 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 24, the recited term "can" does not positively recite the scope of the claim.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 12 and 14-18 are rejected under 35 U.S.C. 102(e) as being b by Swanson (US 2004/0252505).

Swanson shows the structure claimed including infrared modules (28, 30), each module is joined to a rotation point (84, 86) that rotates 360 degree with a flexible (38) that allows for a 180 degree rotation.

With respect to claims 14-18, Swanson shows all the claimed structure, and thus meet all the claim limitations. Furthermore, the recitations regarding the use with the apparatus, it is noted that the articles or elements being worked upon by the apparatus during an intended operation does not limit the apparatus claim. Also see MPEP 2115.

5. Claims 19, 23 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Feyrer (US 1,232,908).

Feyrer shows multiple radiative heaters (34), an adjustable frame (7), each radiative heater is configured to swivel in multiple positions via elements (12 and 11) which are attached to the frame with a clamping mechanism (14) wherein each heater is removable from the frame.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 13, 19 and 22-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swanson (US 2004/0252505) in view of Chapman, Jr et al (US 3,694,647).

Swanson shows the structure claimed except for an adjustable frame.

Chapman shows an adjustable frame with a swivel joint to allow the frame with adjustable positions.

In view of Chapman, it would have been obvious to one of ordinary skill in the art to adapt Swanson with the frame that is adjustable with swivel points to further allow the frame to position the infrared heaters at desired angular positions.

With respect to claim 22, Swanson shows the heaters attached on the frame (12, 16) wherein the drawing Figure 1 shows having the heaters on opposite sides, as being the front and rear/back sides, of the frame when viewed by its profile as shown in the figure.

8. Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Feyrer (US 1,232,908), or Swanson in view of Chapman as applied to claims 13, 19 and 22-24 as above, and further in view of Cekic et al (US 7,697,971) or Robinson (US 4,366,411).

Feyrer, or Swanson in view of Chapman, shows the structure claimed except for the heater being a 2 kilowatt infrared heater.

Cekic or Robinson shows it is known in the art that an infrared heater having at least two kilowatt infrared heater lamps is well known.

In view of Cekic or Robinson, it would have been obvious to one of ordinary skill in the art to adapt Feyrer, or Swanson as modified by Chapman, with the infrared heaters having 2 kilowatt infrared heaters or any desired heating capacity that would meet desired applications by the user.

***Allowable Subject Matter***

9. Claim 21 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

10. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
